

Mahindra launches the versatile 30 series tractors in Turkey

Mahindra launched its new 30 Series tractor at the Bursa Agricultural trade show, hosted at the Tuyap Bursa International Fair & Congress Center in Turkey's north-western province of Bursa. These tractors are Euro III stage A compliant and are developed to cater to the evolved needs of the Turkish Agri-market.

The 30 series tractors, in the 55 to 65 HP, are designed to perform multiple tasks with ease. They are ideal for Primary and secondary tillage, livestock & haulage applications. Loaded with impressive standard features, the complete equipment package offers a high performance engine, easy shift synchromesh transmission with shuttle and a rugged cast iron chassis. The side mounted range and gear shift levers contribute to a clean platform making entry and exit easier. The two speed PTO adds on to the versatility of the tractor.

The 30 series tractors are powered by three cylinders turbo charged and intercooled direct injection, diesel engine offering an unmatched combination of performance, reliability and fuel efficiency. The synchromesh transmission provides smooth shifting on the move. The Standard 8F + 8R speeds maximise performance with a choice of speeds. The dedicated left-hand synchronized reverser provides smooth control for maximum productivity during intensive loader and headland operations. The tractor comes standard with the rear differential lock and the front axle with a “limited slip differential” provides additional pulling power in tough soil conditions.

The distribution and after sales service of Mahindra Tractors, in Turkey, is being handled by Metra (Enka Pazarlama). Present at the launch were Mr Omer Elabar, President of Enka and Mr. Sukru Eltutar & Mr. Orhan Onel, both of whom are Board Members of Edna and Mr. Manoj Dalvi from Mahindra.
